## Advisory Action Before the Filing of an Appeal Brief

Application No.	Applicant(s)	
10/800,992	BECK ET AL.	
Examiner	Art Unit	
Donna Jagoe	1614	

	Donna Jagoe	1614							
The MAILING DATE of this communication appe	ars on the cover sheet with the c	orrespondence add	ress						
THE REPLY FILED 01_March 2006 FAILS TO PLACE THIS AP	PLICATION IN CONDITION FOR A	ALLOWANCE.							
this application, applicant must timely file one of the follow places the application in condition for allowance; (2) a Nor a Request for Continued Examination (RCE) in compliance time periods:	The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:								
The period for reply expiresmonths from the mailing date of the final rejection.  The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.  Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).									
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  NOTICE OF APPEAL									
The Notice of Appeal was filed on A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).  **MMENDMENTS**									
3. The proposed amendment(s) filed after a final rejection, to (a) They raise new issues that would require further core (b) They raise the issue of new matter (see NOTE below (c) They are not deemed to place the application in better the proposed amendment(s) filed after a final rejection, to (a) They raise new issue of new matter (see NOTE below (c) They are not deemed to place the application in better the proposed amendment(s) filed after a final rejection, to (a) They raise new issues that would require further to (b) They raise new issues that would require further to (c) They are not deemed to place the application in better the control of the control	nsideration and/or search (see NO w);	TE below);							
appeal; and/or (d) ☐ They present additional claims without canceling a converse NOTE: (See 37 CFR 1.116 and 41.33(a)).	corresponding number of finally rej	ected claims.							
<ul> <li>4.  The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendments.</li> <li>5.  Applicant's reply has overcome the following rejection(s): See Continuation Sheet.</li> <li>6.  Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amended.</li> </ul>									
non-allowable claim(s).  7. For purposes of appeal, the proposed amendment(s): a) [ how the new or amended claims would be rejected is prov The status of the claim(s) is (or will be) as follows: Claim(s) allowed: Claim(s) objected to: Claim(s) rejected: 31-50. Claim(s) withdrawn from consideration:	☐ will not be entered, or b) ☑ wil	•	_						
AFFIDAVIT OR OTHER EVIDENCE									
<ol> <li>The affidavit or other evidence filed after a final action, but because applicant failed to provide a showing of good and was not earlier presented. 9. The affidavit or other evidence filed after the date of filing a entered because the affidavit or other evidence failed to or showing a good and sufficient reasons why it is necessary	vercome <u>all</u> rejections under appea	al and/or appellant fai	ls to provide a						
10. The affidavit or other evidence is entered. An explanation	of the status of the claims after e	ntry is below or attach	ed.						
REQUEST FOR RECONSIDERATION/OTHER  11. The request for reconsideration has been considered but	does NOT place the application ir	n condition for allowar	ice because:						
12. ☑ Note the attached Information Disclosure Statement(s). (13. ☑ Other: See Continuation Sheet.	PTO/SB/08 or PTO-1449) Paper N	lo(s). <u>03012006</u>							

Continuation of 5. Applicant's reply has overcome the following rejection(s): 112 2nd paragraph rejection of claims 32 and 42 for use of the term "apparent solubility" is withdrawn.

Continuation of 13. Other: Applicant is reminded that page 13 of the specification is still missing. Regarding applicants assertion that the Loftsson reference would not apply because it teaches "prednisolone", not "prednisolone acetate", A generic chemical formula will anticipate a claimed species covered by the formula when the species can be "at once envisaged" from the formula. When the compound is not specifically named, but instead it is necessary to select portions of teachings within a reference and combine them, e.g., select various substituents from a list of alternatives given for placement at specific sites on a generic chemical formula to arrive at a specific composition, anticipation can only be found if the classes of substituents are sufficiently limited or well delineated. Ex parte A, 17 USPQ2d 1716 (Bd. Pat. App. & Inter. 1990). If one of ordinary skill in the art is able to "at once envisage" the specific compound within the generic chemical formula, the compound is anticipated. One of ordinary skill in the art must be able to draw the structural formula or write the name of each of the compounds included in the generic formula before any of the compounds can be "at once envisaged." One may look to the preferred embodiments to determine which compounds can be anticipated. In re Petering, 301 F.2d 676, 133 USPQ 275 (CCPA 1962). In In re Petering, the prior art disclosed a generic chemical formula "wherein X, Y, Z, P, and R'- represent either hydrogen or alkyl radicals, R a side chain containing an OH group." The court held that this formula, without more, could not anticipate a claim to 7- methyl-9-[d, l'ribityl]-isoalloxazine because the generic formula encompassed a vast number and perhaps even an infinite number of compounds. However, the reference also disclosed preferred substituents for X, Y, Z, R, and R' as follows: where X, P, and R' are hydrogen, where Y and Z may be hydrogen or methyl, and where R is one of eight specific isoalloxazines. The court determined that this more limited generic class consisted of about 20 compounds. The limited number of compounds covered by the preferred formula in combination with the fact that the number of substituents was low at each site, the ring positions were limited, and there was a large unchanging structural nucleus, resulted in a finding that the reference sufficiently described "each of the various permutations here involved as fully as if he had drawn each structural formula or had written each name." The claimed compound was 1 of these 20 compounds. Therefore, the reference "described" the claimed compound and the reference anticipated the claims. In In re Schauman, 572 F.2d 312, 197 USPO 5 (CCPA 1978), claims to a specific compound were anticipated because the prior art taught a generic formula embracing a limited number of compounds closely related to each other in structure and the properties possessed by the compound class of the prior art was that disclosed for the claimed compound. The broad generic formula seemed to describe an infinite number of compounds but claim 1 was limited to a structure with only one variable substituent R. This substituent was limited to low alkyl radicals. One of ordinary skill in the art would at once envisage the subject matter within claim 1 of the reference.). Compare In re Meyer, 599 F.2d 1026, 202 USPO 175 (CCPA 1979) (A reference disclosing "alkaline chlorine or bromine solution" embraces a large number of species and cannot be said to anticipate claims to "alkali metal hypochlorite."); Akzo N.V. v. International Trade Comm 'n, 808 F.2d 1471, I USPQ2d 1241 (Fed. Cir. 1986) (Claims to a process for making aramid fibers using a 98% solution of sulfuric acid were not anticipated by a reference which disclosed using sulfuric acid solution but which did not disclose using a 98% concentrated sulfuric acid solution.). See MPEP §2144.08 for a discussion of obviousness in genus-species situations. In this case, Loftsson teaches prednisolone combined with a cyclodextrin for application to the eye. Since there are several prednisolone ophthalmic formulations already on the market as prednisolone acetate, one would "immediately envision" prednisolone acetate with the recitation of prednisolone in an ophthalmic formulation as recited by Loftsson. Further, The claim language comprising leaves the claim open for the inclusion of unspecified ingredients, even in major amounts.

ARDIN H. MARSCHEL
